Attachment 6

Inspector General's Recommendation Number 2e, page 40

Recommended DCI Action: Approve

Inspector General's Statement

Recommended that:

DTR experiment with the concept of a board of overseers composed of senior grade professional officers as a means to improved communication with and indoctrination of consumers, and to promote the development of more effective policies on curriculum and enrollment.

DD/P Comment

✓ Concur in principle. We would stress the experimental aspect of this recommendation, and would prefer to postpone the establishment of such a board until we have completed the study now underway within the Clandestine Services. There is a gap in communication between OTR and its principal consumer, the Clandestine Services, which is not wholly bridged by the ready access which many OTR instructors and staff officers have with the working level of the Clandestine Service Staffs and Divisions.

We will want to study the probably usefulness of a board not only as a means of improving communications, but as a step toward creating a fuller awareness of training responsibilities on the part of Clandestine Service line commanders.
